DESCRIPTORS: *TNT, Production, *Toluenes,
*Nitration.

The method, which was tested under laboratory condi-
tions consists in nitrating toluene with a mixture of
nitric acid and acetic anhydride. The nitrotoluene ob-
tained without or with traces only of meta isomer is
further nitrated by conventional methods to di- and
trinitrotoluene. The purity of the raw trinitrotoluene
prepared by this method is considerably higher than that
of the product obtained by previous methods.
